

BRYAN WAGNER

Senior Security Operations | Fraud Investigation & AI-Driven Enablement

Tucson, AZ | (520) 912-0997 | bryanwagner00@gmail.com | <https://wagzillion.github.io/>

PROFESSIONAL SUMMARY

CFE, CEH, and CCCI-certified security operations leader with 14+ years at Intuit who consistently finds what others miss and builds what doesn't exist yet. Traced a P1 ATO campaign to a third-party platform through email header analysis when the source was unknown. Eliminated a 6,000+ alert takedown backlog that had no owner. Stood up a net-new frontline investigation team of 22 from scratch, hitting 99.3% service level and 108% call volume growth. Built AI tools that now help 12+ T&S professionals produce structured career and performance work in a fraction of the time. The pattern is the same across all of it: identify the gap, own the fix, and leave something durable behind. 14+ years of doing exactly that across fraud investigation, adversary management, cross-functional enablement, and AI-driven tooling. Dean's List and President's List honoree, SNHU.

CORE COMPETENCIES

Fraud Investigation & Intelligence	Account Takeover Analysis	Adversary Infrastructure Analysis
AI Tooling & Workflow Automation	Security Incident Response	External Threat Takedowns
Investigative Dashboard Development	Service Delivery Leadership	Cross-Functional Coordination

PROFESSIONAL EXPERIENCE

Intuit Inc. (2022 – Present)

Senior Security & Risk Operations Analyst

Investigations Enablement & Service Delivery | Customer Trust & Risk Engineering & Compliance (CTREC)

Fraud Investigation & Incident Response

- Served as originating analyst on a P1 security incident (downgraded to P3 at closure) tied to a coordinated ATO campaign attributed to Fighting Ursa botnet infrastructure: identified the phishing email source as a third-party marketing platform through independent email header analysis when the origin was unknown, initiated cross-company outreach to Square/Block for collaborative takedown, and owned customer communication drafting through Legal and Marketing approval. The incident impacted 957+ customers with 359 confirmed ATO fraud victims and \$800K+ in payment exposure; weekly case volume peaked at ~350 before returning to seasonal norms. Coordinated IPD notification delivery across QBO, QBOA, and IES customer segments.
- Produced Director-level intelligence briefings throughout the incident and on an ongoing basis, structured packages covering adversary TTPs, financial impact, case volume trends, and prioritized recommendations, giving leadership decision-ready insight under active threat conditions.
- Built fraud detection dashboards (SQL, Python, Databricks) surfacing ATO patterns, synthetic identity schemes, and typosquatting campaigns, enabling faster pattern identification and supporting proactive mitigation decisions by leadership.
- Conducted Red Zone (step-up MFA) call volume impact analysis for executive stakeholders, providing data-driven evidence that debunked projected volume spikes and directly informed product rollout decisions.
- Served as designated ATO training lead for Intuit Business Credit Card Risk Ops & Policy (~16 people cross-BU) and onboarded 10+ investigators transitioning from Mailchimp post-acquisition, building training paths from scratch in both cases.

AI Tooling, Dashboard Development & Automation

- Designed and deployed the T&S Career Growth Partner, a Claude-powered AI coaching tool enabling 12+ T&S professionals to produce rubric-aligned performance narratives, promotion packages, and peer feedback; reduced self-review drafting time by 40–60% and expanded access to structured career development coaching across the organization.
- Built the Work Radar agent, an AI-driven workflow integrating Claude with Jira, Slack, Outlook, and Google Drive APIs to automatically surface untracked work signals and pre-populate tickets; logged 26 stories across 10 work domains in a single two-week sprint (~1.9 tickets/day), on pace to formally track 500+ work items annually and eliminating the gap between work performed and work recorded.
- Developed and deployed investigative dashboards in Databricks and Qlik (SQL, Python) tracking ATO incident volume, adversary campaign progression, and case resolution velocity, providing leadership with always-on operational visibility and supporting executive-level reporting during active incidents.
- Built and operationalized the CAP PE Quality Assurance program: designed evaluation rubrics, scoring frameworks, and calibration workflows that standardized review quality across frontline investigators, surfaced targeted coaching opportunities, and established a repeatable QA baseline for the team.
- Built the Elevate Page from scratch, a purpose-built knowledge and communication infrastructure for the T&S team housing resource libraries, SOP access, and operational tooling in a single destination that didn't previously exist. Contributed to a 30% reduction in investigation processing time through workflow automation and service delivery standardization built around it.
- Automated Notice of Change processes and investigation workflows, saving \$750K+ annually and eliminating 200+ FTE hours of manual work; leveraged AWS Connect, Splunk, and Python for pipeline automation.

External Threat & Takedown Operations

- Own external threat takedown operations end-to-end across two platforms (legacy and next-gen): personally actioned 5,400+ alerts, eliminated a 6,000+ alert backlog, and established a 2-business-day SLA where none previously existed. Led the full platform migration including SOP development, automation rubric co-design with Threat Intelligence, and cross-team triage workflow design covering domains, social media, phishing kits, dark web, and paid ad abuse. Trained 5 additional analysts and served as the operational owner for ongoing platform health and coverage.

CAP PE Team Build-Out & Service Delivery

- Built the Customer Account Protection PE team from the ground up: 22 people, zero prior infrastructure, including tiered workflows, coordinating Pega rollout and permissions, authoring SOPs, and training 18 frontline experts, 2 managers, 1 trainer, and 1 QA lead. The team hit 99.3% service level, 1.2% abandonment rate, 23-min AHT, and NPS of 37, with weekly call volume increasing 108% from launch.
- Operational POC for two frontline investigation teams (11-person ATO squad and 16-person Tech Support Fraud squad), owning escalation workflows, quality oversight, training, and day-to-day coordination across 27 analysts.
- Partnered with Risk Ops on the IVR/IVA routing project, contributing customer intent analysis and NeLi label data to inform call-routing logic that identifies ATO-impacted customers and directs them to specialized teams based on money entitlement status, projected to eliminate ~780 misrouted contacts/month and reduce handle time by 1M+ seconds/month.

Intuit Inc. (2011 – 2022)

Progressive Roles: Payments, Risk Ops, CX & Technical Support

Payment Operations | Risk Operations | Customer Experience | Technical Support

- Automated Notice of Change processes end-to-end, saving \$750K annually and eliminating 200+ FTE hours of manual work; coordinated multi-team incident response supporting 127,000+ merchants during a critical payments outage, restoring service within hours.
- Advanced through four roles with increasing scope in fraud detection, risk operations, and support leadership, contributing to Stripe Payments integration, Salesforce CRM migration, and early fraud mitigation frameworks that informed current T&S service delivery models.
- Leveraged AWS, SQL, and Splunk to diagnose payment processing issues and escalate high-impact cases to engineering; led partner team training and received multiple leadership awards.

TECHNICAL SKILLS & TOOLS

Languages	SQL, Python
Platforms	Databricks, Splunk, AWS (Connect), Pega, Salesforce, Jira, Confluence, ServiceNow, Qlik
AI & Automation	Claude (Anthropic), Custom GPTs, Cursor / Claude Code, MCP Integration, Splunk MCP Service Account, Workflow Automation
Threat Intelligence	External Threat Takedown Platforms, OSINT, Email Header Analysis, Phishing Infrastructure Analysis
Domains	ATO, Synthetic Identity Fraud, Tech Support Fraud, Phishing Campaigns, Typosquatting, Adversary TTPs, IVR/IVA Routing, Investigator Enablement, Fraud Dashboard Development

CERTIFICATIONS

- Certified Fraud Examiner (CFE), ACFE | Exp. June 2026
- Certified Ethical Hacker (CEH), EC-Council (90% Pass Rate) | Exp. May 2027
- Certified Cyber Crimes Investigator (CCCI), IAFCI | Exp. Sept. 2028

EDUCATION & ACADEMIC HONORS

Southern New Hampshire University (SNHU) - *In Progress*

Bachelor of Science in Cybersecurity

- Dean's List, C-1 2026 Session (January–March 2026)
- Dean's List, C-2 2026 Session (March–April 2026)
- President's List, C-2 2026 Session (March–April 2026)
