CFE | CEH | CCCI

Tucson, AZ | (520) 912-0997 | bryanwagner00@gmail.com | [linkedin.com/in/bryan-wagner-cfe](https://www.linkedin.com/in/bryan-wagner-cfe) | wagzillion.github.io

Fifteen years at Intuit. The pattern is consistent: find the gap, own the fix, leave something durable behind. Traced a P1 ATO campaign to a third-party platform through independent email header analysis when the origin was unknown. Eliminated a 6,000+ alert takedown backlog and established the SLA that governs it today. Built a 22-person frontline investigation team from zero infrastructure, hitting 99.3% service level while absorbing 108% call volume growth. Designed and deployed production AI tools including a fully automated batch QA review system now in active use across Trust & Safety. The work lives at the intersection of deep fraud investigation, adversary intelligence, and AI-driven operational enablement.

CORE COMPETENCIES

ATO Investigation & Adversary Attribution | Phishing Campaign Analysis & Takedown Operations | Security Incident Response | AI Tooling & Workflow Automation | Fraud Detection Dashboard Development | IVR/IVA Routing Architecture | Investigator Training & QA Program Design | Cross-Functional Enablement & Service Delivery Leadership

PROFESSIONAL EXPERIENCE

Senior Security & Risk Operations Analyst | Intuit Inc. · Tucson, AZ | 2022 – Present

Customer Trust & Risk Engineering & Compliance (CTREC) · Customer Account Protection

Fraud Investigation & Incident Response

- Served as originating analyst on a P1 security incident attributed to Fighting Ursa botnet infrastructure independently identified a third-party marketing platform as the phishing source through email header forensics when the origin was unknown, initiated cross-company takedown coordination, and owned customer communications through Legal and Marketing. Incident affected 957+ customers with \$800K+ in payment exposure; resolved to seasonal case volume following full remediation.
- Produced Director-level intelligence briefings throughout the incident lifecycle structured packages covering adversary TTPs, financial exposure, case volume trends, and prioritized recommendations so leadership had what they needed to act while the incident was still live.
- Investigated ATO cases spanning QBO, QuickBooks Payroll, QB Desktop, QB Payments, Mailchimp, and IBCC including building the investigation methodology for IBCC ATO from scratch, an entirely new investigation surface with separate tooling, identifiers, and user models.
- Identified systemic gaps in AUTH ID deactivation and ATO call routing workflows; facilitated cross-functional working sessions to diagnose root causes and drive resolution with operations and engineering partners.
- Built fraud detection dashboards (SQL, Python, Databricks) surfacing ATO patterns, synthetic identity schemes, and typosquatting campaigns; conducted Red Zone call volume impact analysis that directly informed a product go/no-go decision at the leadership level.

AI Tooling & Operational Enablement

- Built and put into production the Pega CAS ATO Quality Audit Program 2.0 a fully automated batch QA review system that replaced manual investigator-by-investigator review with a scalable pipeline scoring cases across four pillars on a 100-point scale, with auto-generated individualized coaching reports delivered to each analyst.
- Designed and deployed the T&S Career Growth Partner, a Claude-powered AI coaching tool enabling 12+ T&S professionals to produce rubric-aligned promotion packages, peer feedback, and self-reviews, reducing drafting time by 40-60%.
- Built the Work Radar agent (Claude + Jira/Slack/Outlook/Drive integration) to surface untracked work signals and pre-populate tickets logged 26 stories across 10 domains in a single two-week sprint, on pace to formally track 500+ items annually.
- Deployed Investigator Assist within the Cursor AI IDE across CAP and SMS analyst teams, packaging ATO skills, Palantir fraud labels, and Databricks query integration into installable bundles with full setup documentation.
- Built the IESD Elevate Page from scratch a central resource hub for investigator SOPs, tooling, dashboards, and training that cut investigation processing time by 30%.

External Threat & Takedown Operations

- Own external threat takedown operations end-to-end: personally actioned 5,400+ alerts, eliminated a 6,000+ alert backlog that had no owner, and established a 2-business-day SLA where none previously existed.
- Led the full ZeroFox-to-Doppel platform migration SOP development, access provisioning, automation rubric co-design with Threat Intelligence, and cross-team triage workflow design. Average takedown time dropped from ~47.7 days to ~15.02 days.

CAP PE Team Build-Out & Service Delivery

- Built the Customer Account Protection PE team from zero: 22 people, no prior infrastructure tiered workflows, Pega rollout and permissions, SOPs, and training for 18 frontline investigators, 2 managers, 1 trainer, and 1 QA lead. The team hit 99.3% service level, 1.2% abandonment rate, 23-min AHT, and NPS of 37, with weekly call volume up 108% from launch.
- Managed escalation workflows, quality oversight, training, and day-to-day coordination for 27 analysts across two frontline investigation squads: an 11-person ATO team and a 16-person Tech Support Fraud team.
- Helped design IVR/IVA routing logic that keeps ATO-impacted customers out of the wrong queue based on money entitlement status projected to eliminate ~780 misrouted contacts/month and cut handle time by 1M+ seconds/month.

Progressive Roles: Payments · Risk Ops · CX · Technical Support | Intuit Inc. · Tucson, AZ | 2011 – 2022

Payments Supportability Specialist · CX Lab Specialist (Payments) · Payroll Support Specialist · Merchant Services Representative

- Started as a Merchant Services rep in 2011 and spent eleven years building toward fraud and security operations moving through payments, risk ops, and CX roles while contributing to Stripe Payments integration, Salesforce CRM migration, and the early fraud mitigation frameworks that current T&S models are built on.
- Led Notice of Change automation saving \$750K annually and eliminating 200+ FTE hours; coordinated multi-team incident response supporting 127,000+ merchants during a critical payments outage, restoring service within hours.
- Served as sole Payments Facilitator in Tucson, training 4 waves of specialists; received Q2 Excellence Award and All-Hands recognition. Selected for the Awesome Agent Experience engineering project migrating Payroll Services Platform to Salesforce.

TECHNICAL SKILLS

Languages: SQL, Python

Platforms: Databricks, Splunk, AWS Connect, Pega, Salesforce, Jira, Confluence, ServiceNow, Qlik

AI & Automation: Claude (Anthropic), Cursor / Claude Code, MCP Integration, Custom GPTs, Splunk MCP, Workflow Automation Pipelines

Threat Intelligence: External Threat Takedown Platforms (Doppel, ZeroFox), OSINT, Email Header Analysis, Phishing Infrastructure Analysis, Adversary TTP Analysis

Domains: ATO, Synthetic Identity Fraud, Tech Support Fraud, Phishing Campaigns, Typosquatting, IVR/IVA Routing, Investigator Enablement, Fraud Dashboard Development

CERTIFICATIONS

- Certified Fraud Examiner (CFE), Association of Certified Fraud Examiners (ACFE), Exp. June 2027
- Certified Ethical Hacker (CEH), EC-Council (90th Percentile Pass Rate), Exp. May 2027
- Certified Cyber Crimes Investigator (CCCI), IAFCI, Exp. Sept. 2028

EDUCATION

Bachelor of Science in Cybersecurity · Southern New Hampshire University (SNHU) · In Progress · Dean's List & President's List (2026)
